

I and my family benefit from listening to XM Satellite Radio, its traffic, business and weather channels. Satellite radio provides a level of variety and high quality not available elsewhere, at least not here in Atlanta, a major market. Here as elsewhere, the Clear Channel Corporation has taken over station after station, so they all deliver content reduced to the lowest possible denominator. We pay for these services and it should not be up to a commercial lobby, the National Association of Broadcasters, to dictate what we are permitted to hear. The Cody family respectfully urges the FCC to reject the NAB's petition 04-160 and to support XM (and Sirius) ability to provide the kind of programming we demand, deserve and pay for. Thank you. John Cody, Patricia Cody, Shawn Cody, Sandra Cody, Fionna Cody, Shivahn Rowell and family.
